FEATURE | FUNCTION | BENEFIT

GOOSENECK COMBO TRAILER | MODEL 8413

FEATURE	FUNCTION	BENEFIT
Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow. Featherlite's stock and stock combo trailers are built with sidewall extrusions that are thicker, allow for stronger welds and vertical tie ring integration and are more scratch resistant.
Uni-Body Design	All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul.
Crossmembers	4" crossmembers run every 12" under the trailer.	Featherlites have a solid support system underneath the trailer for your heavy loads.
Dressing Room	Dressing room with 36" deluxe camper door with window and screen door standard.	When showing cattle or horses, the dressing room provides ample storage and space for your wears and gear along with tools and equipment. Wide camper door provides extra space for entering and exiting with your gear.
Tapered Fenders	Tapered fenders inside trailer are standard.	Tapered fenders reduce opportunities for sharp edges, keeping livestock and horses safe during loading.
Rubber Dock Bumper	Featherlite uses a full width, thick 4" rubber dock bumper on their stock trailers.	The large rubber dock bumper better protects animals during the loading process.

FOR FULL ARRAY OF FLOORPLANS, VISIT WWW.FTHR.COM.

*10-year limited structural warranty on frame and superstructure. 3-year limited warranty on all other parts manufactured and installed by Featherlite. Some exclusions apply. Ask dealer for details. **Trailer may be shown with options.
